Sebastian Quintana Warsop

Tier 2 Service Desk Analyst · Microsoft 365 · Endpoint & Security Support

sbrqw01@gmail.com UK · Remote linkedin.com/in/seb-qw-b14b28365 sebqw.github.io/ITJourney

PROFILE

Tier 2 Service Desk Analyst with seven years in technical support, the last three and a half at a managed service provider (MSP), where I was promoted from RMM Analyst in 2025. I support businesses across a range of industries with Microsoft 365, Entra ID, Intune, Exchange Online and Teams, alongside on-premises servers, networks and line-of-business software, working to SLAs.

I enjoy getting to the root of a problem and explaining the fix in plain English. I hold Microsoft 365 Fundamentals (MS-900) and I'm studying for Microsoft 365 Administrator (MS-102) in my own test tenant. I'm looking to keep growing towards Microsoft 365 and systems administration.

CORE SKILLS

Microsoft 365 administration · Entra ID · Conditional Access & MFA · Intune · Exchange Online · Teams & Teams Phone · SharePoint · Active Directory · Group Policy · Windows Server · PowerShell · RMM & patch management · EDR & endpoint protection · Backup & restore · Networking (TCP/IP, DHCP) · Incident & request management · PSA ticketing & SLAs · Line-of-business application support

EXPERIENCE

Tier 2 Service Desk Analyst 2025 – Present

PCS Business Systems · Managed service provider · Remote

- Take escalations from first-line support and work 1st and 2nd-line incidents and service requests through the PSA ticketing system, prioritising and resolving them within SLA.
- Administer Microsoft 365 and Entra ID for client tenants: users, licensing, security groups, MFA and Conditional Access, Exchange Online mailboxes, SharePoint permissions and data protection with Purview.
- Manage devices and policies with Intune, Active Directory and Group Policy across cloud, hybrid and on-premises environments.
- Support Microsoft Teams and Teams Phone, Windows Server, networking (TCP/IP, DHCP), printers and legacy client systems.
- Support security tooling across client environments, including endpoint detection and response (EDR) and antivirus platforms and MFA, investigating alerts and escalating where needed.
- Provide desktop and application support for proprietary and line-of-business software, from accountancy packages to niche industry applications, working from vendor documentation and with third-party suppliers to resolve faults and warranty claims.
- Use PowerShell to investigate issues and speed up routine admin tasks.

Highlights

- Spotted a brute-force attempt on a client network and closed the exposed Remote Desktop port (3389) it was targeting.
- Resolved a recurring server crash (blue screen) by analysing crash dump files and tracing the cause to conflicting drivers.
- Agreed maintenance and backup windows with clients so patches and updates were applied without disrupting their business.

RMM Analyst Apr 2023 – 2025

PCS Business Systems · Managed service provider · Remote

- Monitored and maintained client devices, software and networks remotely with RMM tools, with a focus on patch management and keeping endpoints healthy.

- Monitored alerts from endpoint security and RMM tools and followed up on issues found.
- Ran client backups and restores.

Support Technician

Jul 2019 – Apr 2023

ID Card Centre · Identity and access control products

- Provided IT troubleshooting, hardware maintenance and technical support for office staff and external customers.
- Administered the company's WordPress intranet, managing user access and keeping technical documentation up to date.
- Configured, maintained and repaired rental hardware and software, and guided customers through card-printing software and card-encoding hardware.
- Helped develop a widely compatible technology card, which led to 24 sales orders and over £11,000 in quarterly revenue.
- Worked with a county council's IT department to scope, build and deploy a bespoke card-encoding solution to strict compliance requirements.

SKILLS IN DETAIL

Microsoft 365 & identity	Entra ID, Conditional Access, MFA, Exchange Online, SharePoint, Teams & Teams Phone, Purview, Intune, Active Directory, Group Policy
Infrastructure & networks	Windows Server, on-premises and hybrid environments, TCP/IP, DHCP, printer management
Security & endpoints	EDR & antivirus, patch management, RMM (N-sight), backup & restore
Desktop & applications	Windows and macOS, proprietary and line-of-business software, accountancy software, ID card printing and encoding software, printers
Service management	Incident and request management, PSA ticketing, SLAs, documentation, supplier and vendor management
Scripting	PowerShell; some C#, Python, HTML, CSS and JavaScript

CERTIFICATIONS & QUALIFICATIONS

Microsoft 365 Certified: Fundamentals
MS-900

Microsoft 365 Certified: Administrator
MS-102 · studying

Level 3 Apprenticeship: IT Solutions Technician
Completed 2022

Level 2 Apprenticeship: IT Application Specialist

PROJECTS

- **FOV CRM 2.0**: rebuilt my apprenticeship C# client-management app as a web app, with search, filters, input validation and spreadsheet import. Live demo on my website.
- **Personal website**: portfolio, CV and MS-102 study notes, deployed with GitHub Actions. I ran a security scan against it and fixed the findings (Content Security Policy, self-hosted resources).

EDUCATION

A Levels · Bishop Stopford Sixth Form
2017 – 2019

GCSEs, including Computer Science · Bishop Stopford School
2012 – 2017
